

# ZOHA AMIN

AI Engineer | Voice AI & Agentic Systems | RAG | Computer Vision

Lahore, Pakistan | +92 304 9320060 | [azoha6966@gmail.com](mailto:azoha6966@gmail.com) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

AI engineer with 2.5 years of experience building production AI systems: voice and calling agents, retrieval-augmented knowledge platforms, and computer-vision pipelines for healthcare. Comfortable owning a project end to end, from model selection and agent architecture through backend APIs and deployment. Recent work at 7 Kings Code includes a multilingual sales calling agent, an AI recruitment platform, and a gaze-tracking system built with an international healthcare research team.

## PROFESSIONAL EXPERIENCE

### AI Engineer | 7 Kings Code, Lahore, Pakistan

Sep 2025 - Present

- Built a [sales cold calling agent](#) supporting 50+ languages across outbound and inbound calling, handling 100+ calls per day, and integrating with 10+ CRM platforms and 7 VoIP providers; identifies each lead's industry, lets users configure campaigns and AI pitch scripts, and logs call outcomes back into the CRM automatically. Offered to clients as tiered service plans.
- Built a conversational [recruitment calling agent](#) integrated with 5+ CRMs and the same VoIP providers, calling candidates for screening and light technical interviews; pulls resumes from multiple applicant tracking systems, generates a tailored job description, matches CVs against it, and advances shortlisted candidates to the next stage.
- Partnered with an international research team to align [Cortality](#), a gaze-tracking system, with real-world clinical and healthcare requirements.
- Directed [Jobsshoppper](#), an end-to-end hiring platform where recruiters post jobs, candidates apply with their resumes, and recruiters review applicants and select the right talent, taking hiring from job posting to final selection in one place.

### AI Engineer | SabaSoft Games Studio, Lahore, Pakistan

Dec 2024 - Sep 2025

- AI-Driven Game Intelligence System:** Designed a system that lets NPCs make context-aware decisions, adapt to changing gameplay environments, and respond dynamically to player interactions. Technologies: Python, Reinforcement Learning, Unity, Machine Learning.
- Predictive Player Analytics & Personalized Gaming Experience Engine:** Developed a machine learning solution that analyses player behaviour, identifies gameplay patterns, predicts player engagement, and supports personalized gaming experiences. Technologies: Python, Scikit-learn, Pandas.

### Junior AI Engineer | Devticks, Bahawalpur, Pakistan

Jun 2024 - Dec 2024

- Built a RAG chatbot that answers user questions from a continuously updated knowledge base rather than a fixed set of documents.
- Built a deep learning image classification model for skin disease detection, trained on Kaggle skin images to classify four conditions: acne, eczema, rosacea, and vitiligo.

## OTHER PROJECTS

- Medical Consultation Agent:** Built a voice-based medical consultation agent using retrieval-augmented generation trained on proprietary healthcare data, with local Whisper speech-to-text and Kokoro text-to-speech for secure, real-time consultations.
- Facial Expression Recognition:** Built a real-time computer vision system that reads facial expressions from live video and classifies emotion across seven categories.
- Financial Advisory Assistant:** Built a conversational assistant that gives personalized budgeting guidance and investment insights through retrieval-based dialogue.
- Agentic Travel Booking Assistant:** Built an agentic AI system with LangGraph that recommends travel destinations and completes flight bookings through multi-step reasoning and API orchestration.

## CORE SKILLS

**Agentic AI & LLM Frameworks:** LangChain, LangGraph, LlamaIndex, LangSmith, Hugging Face Transformers, prompt engineering, finetuning (LoRA, QLoRA), N8N

**Retrieval-Augmented Generation:** Pinecone, Chroma, document embeddings, semantic search, dynamic knowledge retrieval

**Voice & Conversational AI:** OpenAI Realtime API, voice agents, Whisper (speech-to-text), Kokoro (text-to-speech), multilingual phone-based AI interviewing, support, and cold calling

**Machine Learning & Computer Vision:** regression and classification models, predictive analytics, feature engineering, object detection, YOLOv8, CUDA, Vision Transformers (ViT), Segmentation

**MLOps & Cloud:** AWS (EC2, ECR, S3, IAM, Lambda), Docker, CI/CD (GitHub Actions), MLflow, DVC, containerized microservices

**Backend & Databases:** FastAPI, Flask, Django, PostgreSQL, MySQL, MongoDB

## EDUCATION

Bachelor of Science, Information Technology | Islamia University of Bahawalpur

CGPA: 3.74 / 4.00

## CERTIFICATIONS

Deep Learning Specialization - DeepLearning.AI (Coursera) | Generative AI for Developers - Coursera | Learn Python - Scrimba
